

VOIP

We offer a range of VOIP (Voice of IP) solutions to meet the needs of individuals and businesses. Our solutions are not tied into a particular ITSP (Internet Telephone Service Provider). This means that you are free to switch provider as often as you want to ensuring you get the best deals on call charges. You can expect to pay between EUR10-EUR15 per month with a French ITSP with call charges ranging from EUR0.03 per minutes to UK BT numbers and EUR0.25 to UK mobiles to free calls to BT lines in 23 countries worldwide including the UK and EUR0.16 to French mobiles. We are also able to set up accounts with UK providers allowing you to have a UK telephone number in France! Our hardware solutions range from ADSL routers integrating VOIP such as the Draytek 2700VG and 2800VG models, VOIP adapters costing from as little as EUR80HT, through to enterprise level PBX systems from Linksys offering voice mail, auto attendant and call conference facilities. All our router and adapter based systems work with normal DECT wireless handsets - this means there is no need to throw away your old phone or purchase an expensive VOIP compatible handset.

All VOIP solutions are fully configured and tested prior to dispatch by our team and devices for personal customers should simply need to be plugged in for them to work. Enterprise level installations will require time on site and staff training is provided as part of any installation package.
